

BTA'S ACI Services

Application Centric Infrastructure Network Experts

BTA is a Cisco Mentored Installation Network Training Partner who's been working with ACI since before it shipped. We've built an array of Workshops, Services and Trainings with the sole purpose of helping you get the most of your ACI fabric.

SERVICES

BTA has installed hundreds of ACI fabrics and built a proven, repeatable process for success – before & after the sale.

- **ACI Familiarization Workshop:** De-mystifying ACI and providing customer- relevant solutions, based on real-world experience (½-day)
- **ACI Design Workshop:** No hype - plan a next-generation data center architecture that's focused on your business needs (2d)
- **ACI Health Check:** Remote engagement to resolve issues & help customers optimize their production ACI fabric
- **ACI Deployments:** BTA's proven SIMPLE process to successfully deploy customers' ACI fabrics
- **Ensure Networks for ACI:** Managed optimization service with regular deliverables and expert architectural support
- **ACI Run Books:** Operational guidance based on best practices from hundreds of deployments, customized for each customer
- **CSW-ACI Policy Integration:** BTA's Policy Automation Engine (PAE) combines device intelligence and field-proven processes to enable quick & secure application segmentation, at multiple policy enforcement points

TRAININGS

BTA training includes hands-on practice on a live fabric, with top-rated instructors who also deploy ACI in the field.

- **ACI Field Engineer Implementation:** Introduction to ACI & how to deploy it (4d)
- **ACI Operations & Troubleshooting:** Day 2 operations & support (3d)
- **Advanced ACI Essentials:** Design Best Practices, Legacy Integration, Multiple Sites, Micro-segmentation, Advanced L3Outs (2d)
- **ACI Programmability:** Hands-on introduction to ACI programmability (1d)
- **Advanced ACI Orchestration:** Ansible, Puppet/Chef, and others (1d)
- **Advanced ACI Security:** Securing the Fabric, Advanced L4-7, Compliance. (1d)
- **Advanced ACI Integrations:** Hypervisors, Containers, etc. (1d)
- **Advanced ACI Routing:** Transit routing, Shared L3Out, & protocol tips (1d)
- **ACI Modular Advanced Training:** Customized training program including any or all of the above topics. Mix & match modules for training that exactly matches your customers' needs.
