Cisco Secure Workload (CSW) is the premier Micro-Segmentation & Workload Protection Platform. BTA's years of CSW experience will quickly and safely secure your Windows AD Domain Controllers.

WHAT IS THE STARTER PACK SERVICE?

Microsoft Domain Controllers (DCs) are crucial components of Active Directory (AD) environments, responsible for authenticating and authorizing access to network resources. As such, compromising a DC can lead to severe cybersecurity risks, including:

- Data theft and exfiltration
- Network-wide privilege escalation
- Ransomware attacks
- Credential theft
- Malware propagation
- Denial of Service (DoS) attacks

HOW DOES THIS WORK?

BTA will work with your team to deploy CSW SaaS agents to your Domain Controllers and other servers. We'll then build foundational Scope design and Annotation inputs to optimize CSW's application flow discovery

After collecting live flow data from your agents over several weeks, BTA will leverage CSW's Application Dependency Mapping capabilities to categorize all the traffic to and from your Domain Controllers. BTA will cooperatively develop an enforcement strategy to lock down your DC's, so that only authorized devices can access them, and only authorized ports and protocols can be used.

You'll get detailed as-built documentation on the CSW deployment and DC protection policy. Plus, BTA will provide a year's worth of our Ensure Managed Service, delivering agent and policy maintenance. This service also includes monthly review calls to examine the wealth of traffic security information you'll be getting from the deployed CSW agents, including other risks, vulnerabilities, and odd traffic patterns.

STARTER PACK DELIVERABLES

Our Windows AD DC Micro-Segmentation Starter Pack includes:

- CSW SaaS setup and Scope design
- Installation of up to **100 agents**, with labels
- ADM and Policy Enforcement for Active Directory servers
- As-built documentation
- 1 year of agent and policy enforcement maintenance with monthly review calls

WHY BTA?

Unbeatable Experience
- >100 CSW Deployments
- Led CSW services since before it shipped

Proven Processes for Rapid Value
- BTA's model: SIMPLE
- Customer Adoption Lifecycle
