# Cisco Nexus Dashboard Assessment

**Is your Nexus fabric truly enabling your business? Is your staff up-to-speed on the latest capabilities? Do you have the best Nexus Dashboard deployment for your needs?**

**Nexus Dashboard Assessment may be just what you need.**

## OVERVIEW

---

A Nexus Dashboard (ND) Assessment is a deep-dive evaluation of your controller & fabric. We'll look at design, deployment, operations, skillsets, and more.

## PROCESS

---

An ND expert will spend time with your team. This expert will follow an interactive 3-step process to guide your team to optimizing and using your ND deployment.

### 1. Identify current pain points or issues

Our ND expert will start the session with a brief guided interview to identify and isolate the specific pain points related to your ND deployment. These may be technical, business, and/or process related. We'll also leverage our Architect Explorer™ platform to gather key data from the ND cluster itself.

### 2. Address training gaps

This is a mentoring engagement, so there will be knowledge transfer training as the current issues are tackled. Additionally, we'll evaluate the comfort & confidence level of your network operations team. Or perhaps your key ND-trained resource has left the company, and the team is doing the best they can to fill in.

Our ND expert will assess whether training gaps are a critical issue, and then spend time teaching to those gaps.

### 3. Best practices & architecture design readout

The Assessment will conclude with an interactive readout report. Our ND expert will evaluate the current architecture, health, operations and more, and make field-tested recommendations to best prepare your fabric to meet the needs of your business.

The ND Assessment readout will address:

- Business drivers
- Cluster configuration
- Recommended architecture
- Hardware, Software, and Features
- Team skillset
- Operations
- Integrations

## WHY BTA?

---

BTA has been deploying and teaching Cisco datacenter solutions since our founding 15 years ago. We've deployed well over seven hundred fabrics, and have the hands-on experience you need.

**Optimize your data center network with Nexus Dashboard Assessment today!**
