

Nexus Dashboard Starter Pack Monitor & Scale with BTA

Cisco Nexus Dashboard is a single launch point to monitor and scale across different sites. With Nexus Dashboard, NetOps can achieve command and control over global network fabrics, optimizing performance and attaining insights into data center and cloud operations. Take control of your hybrid cloud operations with Cisco Nexus Dashboard and configure, operate, and analyze - all from one place.

WHAT IS THE STARTER PACK SERVICE

BTA's Starter Pack service is designed to bring up Nexus Dashboard confidently, and provides field-based coaching to realize value quickly.

HOW DOES THIS WORK?

BTA will work with your team to deploy Nexus Dashboard and relevant applications.

To begin the process, BTA will conduct a planning session, to validate readiness and review an action-oriented pre-deployment checklist.

Then the fun starts.

We'll work with you to deploy one Nexus Dashboard cluster (physical or virtual), and connect it to up to two data center fabrics (ACI or DCNM).

Select your choice of Nexus Dashboard applications. BTA will mentor your team in deploying the application, onboarding fabrics, and putting the apps to work.

Each Starter Pack includes familiarization training as well, to provide best practices for Day 2 operations and platform management.

STARTER PACK OPTIONS

NDB: Nexus Dashboard Base. Install up to 3 Nexus Dashboard nodes, and onboard up to 2 fabrics.

NDI: Nexus Dashboard Insights. Install the NDI application, and onboard up to 2 fabrics.

NDO: Nexus Dashboard Orchestrator. Install the NDO application, and migrate up to 2 ACI fabrics from Multi- Site Orchestrator (NSO) to NDO.

NDFC: Nexus Dashboard Fabric Controller. Install the NDFC application, and migrate up to 2 NX-OS fabrics from Data Center Network Manager (DCNM) to NDFC.

Familiarization Training: every option includes a training session specific to its use case, with will give your team a kick-start in getting the most from the platform.

WHY BTA?

Our extensive knowledge and experience in building and operating data center and cloud networks provides unparalleled expertise, and is foundational to every BTA mentoring engagement.
